

SCRUM REPORT and MEETING AGENDA

Report #: 5
Date: 04/19/21

Project Name: Health360
Prepared by: Reyandra Okvianto

Attendees for the meeting

1. Reyandra Okvianto
2. Pouyan Sabahi
3. Nicholas DSouza
4. Brendon Banasik
5. David Fasina

Agenda for the meeting

6. Updates on the database
7. Updates on 3rd API usage
8. Address how we will conduct user studies this week

Overall accomplishments since last meeting

1. Successfully utilized a 3rd API
2. Pushed social features towards stretch goals
3. Created a user study proposal and outlined the interviews for the week
4. Tested the database and connected to the application

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Create a nutritional Calculator	Rey	No
Pull information from NewsAPI	Rey	Yes
Look into gmail notifications	Pouyan	Yes
Begin displaying information from diet & fitness pages on main landing page	Pouyan	Yes
Allow the user to update the workouts planned for the week	Pouyan	Yes
Connect fitness profile with database	Nicholas, Brendon, David	Yes
Save the user's information onto the database	Nicholas, Brendon, David	Yes
Allow users to edit their profiles	Nicholas, Brendon, David	Yes
User studies & Proposal	All	Yes

Plans for next period

1. Begin conducting interviews for user studies
2. Continue to connect features with the database
3. Create the nutritional calculator
4. Filter recipe/food search by allergies/diet
5. Test deployment

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Try and deploy the project	Rey, Pouyan
Conduct user study interviews	All
Create nutritional calculator	Rey
Create the login page	Pouyan
Continue connecting user account information	David, Nicholas, Brendon
Connect workouts from calendar to the database	David, Nicholas, Brendon

Project management status

1. More confident in my ability to manage my team and project
2. Better at organizing individual tasks completed by members
3. Majority of functionality is working correctly
4. Team members are very reliable and have exceeded expectations
5. Team members contribute their individual ideas and opinions at every meeting

Minutes from previous meeting

Our team was able to implement the 3rd API. We had to ditch the idea of using the Strava API for this current phase because it was providing a lot of issues on our end to make API requests. Instead, we were able to utilize the New York Times API to pull health/fitness related articles that the user can view in hopes that it would give them tips/advice. Our team also went over the progression over the weekend of the status on the connection between the database and our front end. We also met up with our TA Nick to discuss our plan in conducting our user studies.
