1. Modified the layout of more components
2. Added responsive animations
3. Modified the fitness landing page layout
4. Fixed the structure of the information pulled from wger API

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Host the project (database included)	**All**	Yes
Connect remaining features to the database	**David, Brendon, Nicholas**	Yes
Modify Articles displayed on landing page	**Rey**	Yes
Restructure the information displayed from the API	**Rey, Pouyan**	Yes
Fix the workout button on the fitness landing page (align with goal setting table)	**Brendon**	Yes
Add details to design (not important, but contributes to overall look/feel of the project)	**All**	Yes
Test components, functionality (redirection, button clicks, searching, etc.), and responsiveness of website	**All**	Yes

Plans for next period

1. Finalize all design details (CSS)
2. Host the full project
3. Test all functionalities, responsiveness, animations, features, etc.

4. Begin planning the final presentation

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Host the project (database included)	**All**
Connect remaining features to the database	**David, Brendon, Nicholas**
Add details to design (not important, but contributes to overall look/feel of the project)	**All**
Test components, functionality (redirection, button clicks, searching, etc.), and responsiveness of website	**All**

Project management status
1. Team members continue to show initiative and complete more than what is expected
2. Scheduled more meetings in the past 24 hours to finalize project
3. Project status - Front end at 100%, Backend at 90%, Hosting
4. Currently on track to complete all remaining tasks on the final sprint
5. Working around issues with hosting the project

Minutes from previous meeting

Our team spent the beginning of the meeting working together to try and debug the errors found within the embedded JavaScript files that prevented our application from being able to save the content users edit in the calendars. We have managed to clean up some errors and hope to debug all by tomorrow. I have discussed with my members that in the event that the project can not be deployed with the backend, we have a really solid foundation of the front end to confidently say that we have a working application with a handful of features that would benefit the user. Lastly, we discussed the times we plan to prepare for our final presentation.
