SCRUM REPORT and MEETING AGENDA

Report #: 2   Project Name: Health360_____

Date: 04/07/21_____   Prepared by: Reyandra Okvianto _____

Attendees for the meeting
1. Reyandra Okvianto
2. Pouyan Sabahi
3. Nicholas DSouza
4. Brendon Banasik
5. David Fasina

Agenda for the meeting
6. Update on individual assignments
7. Plans for the rest of the week
8. Future meeting expectations
9. Assign more tasks

Overall accomplishments since last meeting
1. Pulled API functions from wger API
2. Created template for landing pages
3. Presented project update to Professor & TAs
4. Began development/implementation phase
5. Assigned tasks to everyone
6. Completed tasks from sprint backlog

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Build & Design main landing page structure (home page)	Nicholas	Yes
Build & Design landing page for fitness tab	Pouyan	Yes
Build & Design landing page for diet tab	Brendon	No
Pull Information from API Requests	Rey, David	Yes
Fitness API	David	Yes
Diet API	Rey	Yes
Decide on color scheme, layout, & consistent design	Nicholas, Pouyan, Brendon	Yes

Plans for next period
1. Continue pulling information from APIs
2. Read documentation on web tools
3. Continue designing landing pages
4. Begin developing additional pages
5. Merge API calls/functionality with front end

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Build & Design landing page for diet tab	Brendon
Creating the button functionality for the diet page	Pouyan
Test & Pull information from the Strava API	Pouyan, David
Creating the button functionality for landing page	Nicholas
Pulling workouts & display information	David
Filter recipe search	Rey
Allow the user to search up nutrients of foods	Rey

Project management status

1. Understanding requirements/deliverables with more clarity
2. Teammates are very responsive and reliable
3. Each member has taken initiative to do more than what is assigned
4. Gauging the sprint backlog consistently to see what tasks are realistic
5. Frequently updating the backlogs and burn down charts
6. Giving consist updates to teammates

Minutes from previous meeting

Since our last meeting, our team was able to present our idea with Professor Lightfoot and the TAs. We received feedback from them and made adjustments to certain things that they had questioned us on. Each member has been assigned individual tasks and continues to show their individual trustworthiness and responsibility by showing up at meetings with frequent updates on their status. We have narrowed down our 3 APIs and have had Rey and David extract information from them. Pouyan, Nicholas, and Brendon have been designing the front end and have been making commits to the GitHub. David and Pouyan will begin testing the Strava API and begin merging the front end page for the workout/fitness section with the information David extracted from the wger API. Rey has completed the functionality of searching for recipes and will begin implementing the search of individual foods and their nutrients.
