SCRUM REPORT and MEETING AGENDA

Report #: 8   Project Name: Health360_____

Date:_04/28/21_____   Prepared by: Reyandra Okvianto _____

Attendees for the meeting
1. Reyandra Okvianto
2. Pouyan Sabahi
3. Nicholas DSouza
4. Brendon Banasik
5. David Fasina

Agenda for the meeting
6. Updates on the database
7. Updates on hosting
8. Notes from Office Hours with Nick Milef
9. Discuss the efforts needed on the backend

Overall accomplishments since last meeting
1. Utilized a maps API to display nearby gyms
2. Information can be pulled & displayed from the database
3. Landing Page has been modified
4. Added responsive features to the navigation bar
5. Accessibility features added to the project
6. Cleaned up the design of the project

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Create the components for areas of accessibility	**Pouyan**	Yes
Host the project (database included)	**All**	In Progress
Connect remaining features to the database	**David, Brendon, Nicholas**	Yes
Modify Articles displayed	**Brendon, Nicholas**	Yes
Create responsive navigation bar	**Brendon**	Yes
Add details to design (not important, but contributes to overall look/feel of the project)	**All**	In Progress
Test components, functionality (redirection, button clicks, searching, etc.), and responsiveness of website	**All**	In Progress

Plans for next period
1. Clean up the fitness page

2. Restructure the layout of certain components
3. Continue connecting database to all features necessary
4. Host the full project

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Host the project (database included)	**All**
Connect remaining features to the database	**David, Brendon, Nicholas**
Modify Articles displayed on landing page	**Rey**
Restructure the information displayed from the wger API	**Rey, Pouyan**
Fix the workout button on the fitness landing page (align with goal setting table)	**Brendon**
Add details to design (not important, but contributes to overall look/feel of the project)	**All**
Test components, functionality (redirection, button clicks, searching, etc.), and responsiveness of website	**All**

Project management status
1. Team members have grown more confident in their individual capabilities
2. Team members continue to show initiative and complete more than what is expected
3. Currently on track to complete all remaining tasks on the final sprint
4. Lots of issues on the backend are preventing large strides to finish the project
5. Testing/Clean-up of code is going well
6. Considering alternative solutions to hosting the project on heroku

Minutes from previous meeting

Our team has been putting a lot of effort in fixing the bugs within the server-side JavaScript. We have found certain errors that have slowed down the progression of our project towards a fully functional application. Members that had gone to Nick Milef's office hours updated all members on comments made by Nick as well as his tips/advice for us as we try and deploy the project. We have also discussed the different design details that needed to be modified. Our team spent some time as well discussing what tasks we had to throw out because of the approaching deadline.
