1. More confident in my ability to manage my team and project
2. Better at organizing individual tasks completed by members
3. Majority of functionality is working correctly
4. Team members are very reliable and have exceeded expectations
5. Team members contribute their individual ideas and opinions at every meeting

Minutes from previous meeting

Our team was able to conduct all of our interviews and have collected a decent amount of data that we will organize into the user study report. In addition, we have been working hard to host the project as well as connecting more features to our database. This week has been very busy with other classes so our progress has slowed down a little for the last week of this sprint. Lastly, our team has begun going back and adding additional user-friendly features in different aspects of the project.
